

## Scope

Auto Glass University provides a week long school focused on auto glass repair and replacement. No prior experience is necessary to attend. It contains two full days of classroom training and a two day "hands on" installation workshop where students work in teams to remove, install and repair glass in actual vehicles. On the last day of the class, students practice windshield repairs, review the materials learned during the week and take the final exam. Each student is given a copy of the textbook "The Complete Guide to Auto Glass Installation" to use as a study guide during the class and to keep for future reference.

AGU's training is presented without bias by certified instructors who share their experience with each participant. The curriculum teaches the requirements set forth by Federal Motor Vehicle Safety Standards, the Auto Glass Safety Council's AGRSS Standard for aftermarket replacements and the technician certification programs recognized by the insurance industry.

AGU is sponsored by companies who recognize the value to the industry of having qualified, competent technicians. These companies may showcase their products or services away from the classroom for the benefit of students who wish to learn more. The only equipment necessary for the students to bring is a pair of safety gloves and glasses.

By the end of the class students will know the components of a safe, successful installation and will be given the resources to answer questions in the field.

## Class Schedule

February 16-20, 2015	Austin, TX
March 9-13, 2015	Minneapolis, MN
June 5-12, 2015	Austin, TX
August 17-21, 2015	Detroit, MI

## Auto Glass Installation School

### Our Mission

Auto Glass University provides a comprehensive, up to date and "hands-on" training school for auto glass technicians. Along with intensive initial training, AGU provides continuing guidance through its online courses, blogs, meetings and webinars. AGU graduates enter into a community of industry leaders recognized for their technical competence.

## **Auto Glass University**

### **Course Options**

#### **TECH NATIONAL**

Held once each quarter at Equalizer Industries' beautiful training facility in Austin Texas. State of the art location provides the optimal environment to practice using the best tools and learning the proper procedures.

#### **TECH REGIONAL**

Brings AGU to your local community to provide cost savings on travel and hotel expenses. Allows technicians to relate to issues and conditions within their own region while adding the value of working with diverse regional technicians and trainers.

#### **TECH LOCAL**

Bring Auto Glass University to your company to present the one week curriculum to your technicians in house. You can continue to operate your business, while technicians are being trained on the job. This allows your business to operate as normal with after work classroom time for teaching and testing.

#### **TECH CUSTOM**

Allows your company to select which topics are taught at your own location, to their own technicians. This allows for customized education to fit your specific needs and the time element allowable for training. Although this course does not earn Auto Glass University diploma, it does provide education targeting your technicians' specific needs.

### **Auto Glass University Provides**

#### **36 hours of Comprehensive training**

Technicians will be able to deliver a quality installation on any vehicle they come across in the field. This results in greater productivity, less re-work and a way to differentiate your company in a crowded marketplace.

#### **Training by Top Industry Experts**

Students will share in the knowledge and research gained from decades of combined installation experience. These educational professionals exercise proven training techniques so the job is done right the first time and every time. Up go your profits and reputation!

#### **Auto Glass University Graduate Diploma**

Graduates have validation of successful testing and course completion. It assures that your technicians have attained proven skill development to keep productive and on the leading edge of technology.

#### **AGSC Technician Certification Prep**

AGU prepares technicians for the readiness of passing AGSC Technician certification. This will protect your company from liability, enable you to accept insurance work, and provide potential cost savings

#### **Admittance to a Community dedicated to Excellence**

By spending the week immersed in a complete learning environment, absent of distractions, students gain a diversity of perspectives and an experience that puts them among "the best of the best". Graduates will have a resource to call on in the field along with continuing educational opportunities.
